

**polygro®**  
a Tapex Group business

Catalogue edition: January 2021

Founded in 2001, now a **Tapex Group** business, Polygro® offers a wide range of custom product solutions to all sectors of the Australian horticultural industry.

Backed by solid research and development, our products are the most innovative and cost-effective solutions available to the horticulture, viticulture and related markets. With a keen focus on product development and with 20 years' industry experience, Polygro® is the expert in supply chain management, customer support and 'tomorrow's solutions'.

Our key objective is to source, supply and provide superior protection solutions to our customers across Australia, helping them to deliver high-quality and safe food produce to their own customers locally and internationally.

Polygro® provides you with the best and most up-to-date products to grow your crops – and your business!

## Polytunnels

Polygro® is the sole Australian agent for Elite Tunnels Scotland UK. Supplying and installing all types of polytunnel houses and table tops to suit your growing needs. We also provide a full range of polytunnel films that are sourced from RKW Hyplast Belgium.

Elite's Spanish Tunnel Houses offer superior control of plant and crop production earlier or later depending on requirements - because plants are not exposed to the elements.

This system is also popular for use as a shade net structure and is available in multiple or single spans.

Polygro® table top production considerably reduces the labour input necessary for crop field preparation, therefore reducing overall costs. Table top production also provides a hygienic in-field environment and optimal growing conditions for your crops.

### Polytunnel houses are suitable for producing:

- Soft Fruit
- Stone Fruit
- Vegetables
- Flowers
- Herbs

### Optional extras:

- Available in leg spacings to suit individual requirements.
- Tunnel Widths: 6m – 9m.
- Choice of polythene film or shade net.

# Polytunnel Spares, Table Tops and Film

## Tunnel Spares

Polygro® offers a wide range of **parts and accessories** to support tunnel house growing systems.

These include:

- Clips and Clamps to suit 40mm and 50mm Pipe
- Legs (standard size)
- Hoop Steel
- Gripples
- Poly Film Repair Tape
- and much more!

Please contact us at Polygro® for further information.

## Table Tops

**Table Top systems** offer growers several advantages. Perhaps the biggest advantage is the ease of harvesting the crop, resulting in a significant reduction in labour costs. Table Top systems also assist in better disease control by creating a more hygienic in-field environment, leading to higher yields and better financial returns.

Polygro offers a choice of different support systems, including:

- Tensioned Wires
- Gutter Systems

Manufactured by **RKW Hyplast** of Belgium, Polygro's high-quality **greenhouse film** can dramatically increase crop quality and yield. These co-extruded films, in up to 7 layers, are among the best in the world and combine a high light transmission (PAR), years of longevity and strong mechanical properties. Through a series of specific film properties and additives, RKW Hyplast has developed the ideal film for any climate and any crop.

- **Thermicity:** Added mineral fillers or co-polymers prevent much of the longwave infrared radiation (heat) leaving the greenhouse. Slower cooling under thermic films keeps heating costs down.
- **Diffusion:** Too much direct light can be harmful to plant growth, especially in regions with intense sunlight. Added mineral fillers promote broader, more equal light dispersion, reducing crop stress and assisting healthy plant growth.
- **Anti-Drip Effect:** Water droplet condensation and dripping can block up to 20% of the (PAR) light, which can damage crops. Film additives help condensation to form a thin water layer on the greenhouse film that then drains off to the side, resulting in more light and less humidity.
- **Anti-Mist:** Anti-drip films can cause fog to accumulate inside the greenhouse in the morning. Anti-mist films can help prevent this. It is recommended that anti-drip films are only used in well-heated and/or ventilated greenhouses, where the roof has sufficient slope.
- **UV-Blocking/Anti-Petal Blackening:** Ultraviolet radiation can sometimes damage crops. UV-blocking additives prevent this radiation from entering the greenhouse and 'petal blackening' is avoided.
- **Cooling Effect:** Some radiation frequencies only provide heat. In warmer climates it is useful to block irradiation heat as much as possible, to avoid overheating and evaporation. Patented special interference pigments in Hyplast's films selectively reflect certain wavelengths to help block irradiation heat, making 'whitening' or screening of the greenhouse unnecessary.
- **Anti-Dust Action:** Extra-smooth film minimises the potential for dust sticking to it, resulting in higher light transmission and easier cleaning.
- **Resistance Against Pesticides:** Pesticides, especially sulphur and chlorine, that contain 'reacting agents' can have a very negative effect on the lifespan of greenhouse film. Protective film additives help to control these influences. It is still essential that pesticide use in combination with PE films is avoided as much as possible, as pesticides used in high concentration will accelerate film ageing.

Product Code	Description	Width (M)	Length (M)	Thickness (um)
7175094	HytiTunnel	10.7m	600m	180µm
7175095	HytiTunnel	11.2m	600m	180µm
7175093	Anti-Viral Film	5.5m	75m	180µm
	Custom films and sizes available (subject to MTO quantities)	5m-14m	Up to 600m	150-300µm

## CocoMax® Grow Bags

**CocoMax® Grow Bags** contain quality controlled, washed coco peat. We offer a variety of coir chip mixes and bag sizes to suit different crop requirements, backed by years of knowledge, experience and research. We also assist in product development for various plant applications, tailored to the growers needs.

### Types of Coco Peat available:

- Multi-Purpose 8L, 70:30 Suits:
  - melons, cucumber, zucchini, raspberry, blackberry, tomatoes, capsicum, eggplant etc...
- Strawberry 8 and 12cm height x 1m 70:30
- Tomato 1m 5 hole 50:50
- Blueberry 90:10 2x blocks 30L
- 100% peat/pith 5kg block

Custom sizes, mixes, buffering and dual or triple layering is available on a MTO basis. Please contact Polygro® for further information.

# Polygro® Twines

## Trellis Twine

Polygro® Trellis Twine is a high-strength, highly UV-resistant polypropylene twine that has been specifically designed for crop trellis support. Polygro's Trellis Twine provides peace of mind that plants will be supported on trellis systems for their entire lifecycle.

Product Code	Description	Length/ Spool (M)	Unit	Colour
7150005	Trellis Twine Blue	2,000	2 spools /pack	Blue
7150006	Trellis Twine Pink	2,000	2 spools /pack	Pink

## Grower's Twine

Polygro® Grower's Twine is a high-strength, highly UV-resistant polypropylene twine that has been specifically designed for cucumber crop support. Polygro® Grower's Twine provides the convenience of a multi-ended coil that allows 50 twines to be cut to specific lengths at the same time, decreasing labour costs.

Product Code	Description	Length/ Spool (M)	Unit	Colour
7150004	Growers Twine Green 50 ends x 80m	4000	Coil, 50 x 80m ends	Green
7150007	Growers Twine Green 50 ends x 250m	12500	Coil, 50 x 250m ends	Green

## GRAPEDRAPE® Hex Over Row Netting

Polygro® **GRAPEDRAPE® Hex Over Row netting** is a market leader and has been used in vineyards all over Australia for more than 15 years.

Our nets are manufactured using high density polyethylene yarn (HDPE), knitted in a 15mm hexagonal-shape pattern that gives the net better strength integrity. Polygro® netting is UV-stabilised to ensure durability and carries a 10-year pro-rata UV warranty.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
7120043	Hex Over Row Net	6m	300m	30gsm	White
7120027	Hex Over Row Net	10m	300m	30gsm	White
7120042	Hex Over Row Net	13m	300m	30gsm	White
7120014	Hex Over Row Net	15m	300m	30gsm	White
7120057	Hex Over Row Net	15m	300m	30gsm	Black
7120007	Hex Over Row Net	17m	300m	30gsm	White
7120085	Hex Over Row Net	17m	300m	30gsm	Black

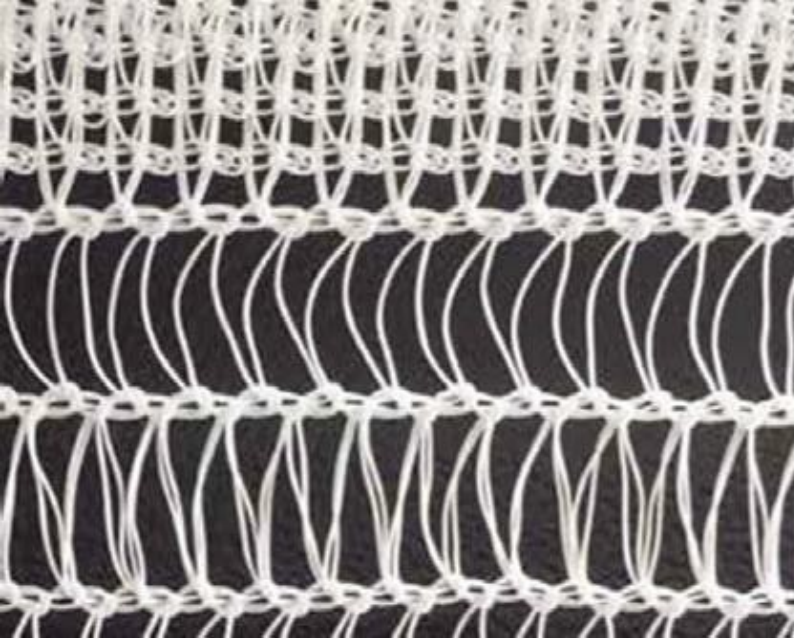

## BirdStop® Commercial Orchard Net

**BirdStop® Commercial Orchard Nets** are manufactured using HDPE yarn for tougher handling and a longer life. Our orchard nets are the ideal mesh size structure to repel birds with minimal shading and excellent air circulation.

Polygro's Commercial Orchard Nets are simple to install and can be supported by basic post and wire frames, or draped directly over canopy structures. Our netting is UV-stabilised to ensure durability and comes with a 10-year pro-rata UV warranty.

Product Code	Description	Width (M)	Length (M)	Weight	Hole Size	Colour
7120022	Birdstop® Orchard Net	5m	100m	45gsm	15mm	White
7120023	Birdstop® Orchard Net	5m	100m	45gsm	15mm	Black
7120019	Birdstop® Orchard Net	10m	100m	45gsm	15mm	White
7120020	Birdstop® Orchard Net	10m	100m	45gsm	15mm	Black
7120029	Birdstop® Orchard Net	15m	400m	52gsm	15mm	Black
7120000	Birdstop® Orchard Net	13m	350m	52gsm	20mm	White
7120037	Birdstop® Orchard Net	13m	350m	52gsm	20mm	Black
7120003	Birdstop® Orchard Net	15m	350m	52gsm	20mm	White
7120004	Birdstop® Orchard Net	15m	350m	52gsm	20mm	Black
7120002	Birdstop® Orchard Net	15m	350m	52gsm	20mm	Grey
7120047	Birdstop® Orchard Net	20m	300m	52gsm	20mm	Black

## Crop Protection

### HailStop™

Polygro HailStop™ nets offer superior protection from hail with a system that is both safe and economical. Our nets have an excellent strength-to-weight ratio that virtually eliminates any risk of damage from hail, while also providing very light shade protection for the crops underneath.

HailStop™ nets are manufactured from HDPE monofilament, knitted in a sawtooth pattern. Reinforced eyelets are located at both outer edges and at 750mm in from each side, with a 100mm reinforced centre line.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
7120006	HailStop™ Hail Stat Net	6.5m	200m	80gsm	White
MTO	Crossover Net	10m – 18m	100m – 400m	95gsm	Any

*Note:* MTO product requires a minimum of 3000kg production. Can manufacture between 1000kg – 2999kg with a surcharge of \$1000.00. No manufacturing under 1000kg.

### Crossover Net

Polygro's Crossover net is predominantly designed to protect crops from damage caused by hail, but it also offers protection from birds and wind. These permanent structural nets enhance the growing microclimate and reduce evaporation, while also providing shade for crops.

The Crossover's wider widths and added stretch make it more suitable as a permanent structure than nets of a narrower width. The net is designed with guide tags on its edges at 10-metre intervals and comes with a coloured centre marker for alignment.

Product Code	Description	Width (M)	Length (M)	Weight	Hole Size	Colour
7120062	Crossover Net	13m	350m	60gsm	16mm	Grey
7120015	Crossover Net	15m	350m	60gsm	16mm	Grey
7120016	Crossover Net	20m	300m	55gsm	25mm	Black
MTO	Crossover Net	10m – 18m	100m – 400m	MTO	13mm	Any

*Note:* MTO product requires a minimum of 3000kg production. Can manufacture between 1000kg – 2999kg with a surcharge of \$1000.00. No manufacturing under 1000kg.

# Crop Protection

## SunStop® Shadecloth

Polygro SunStop® is our commercial grade shade-cloth providing protection from direct sunlight with shading percentages ranging from 30-70%.

SunStop® assists in managing light exposure to plants, animals and people by providing uniform shading, regulating temperatures and retaining moisture.

Made from premium knitted HDPE mono-filament with a reinforced edge and button eye holes, our product boasts enhanced durability, high UV stabilisation and a 10-year pro-rata UV Warranty.

This product can also be utilised for privacy screening.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
7135001	Hort SunStop® 30%	1.83m	50m	90gsm	Black
7135006	Hort SunStop® 30%	1.83m	50m	90gsm	Green
7135008	Hort SunStop® 30%	1.83m	50m	90gsm	White

# Crop Protection

## WindStop™

Polygro WindStop™, is our commercial grade windbreak cloth providing protection from wind damage with deflection percentages ranging from 30 - 70%.

Strong winds can limit the productivity of your crop; breaking branches, lacerating flowers and leaves, bruising fruit or causing premature drop. Polygro WindStop™ deflects winds, providing a safe zone, reducing plant moisture loss and can even assist with erosion control.

Made from premium knitted HDPE mono-filament with a reinforced edge and button eye holes, our product boasts enhanced durability, high UV stabilisation and a 10-year pro-rata UV Warranty.

This product can also be utilised for privacy screening.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
W7135001	WindStop™ 30%	1.83m	50m	90gsm	Black
W7135006	WindStop™ 30%	1.83m	50m	90gsm	Green
W7135008	WindStop™ 30%	1.83m	50m	90gsm	White

# Crop Protection

## Frost Cloth

Polygro Frost Cloth is available in either spun-bonded non-woven cloth, or knitted tape/tape micro fleece. Both reduce the effects of frost and enhance growth, thus promoting an earlier harvest.

Frost Cloth traps warmth in the soil to keep warmer air close to and around the plant, preventing rapid surface cooling that leads to frost formation. The cloth becomes the surface on which the moisture freezes, rather than on the plant tissues themselves, thus maintaining a healthy and safe crop.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
7115002	Frost Cloth	3.2m	100m	20gsm	White
7115003	Frost Cloth	1.8m	100m	30gsm	White
7175039	Frost Cloth	1.8m	100m	50gsm	White
7115004	Frost Cloth	3.2m	100m	50gsm	White

## Reflector Mat

Reflector Mat is a heavy-duty, woven polyethylene sheet that is designed to enhance light reflection from below the fruiting zone, to help consistent colouring of the fruit. Made from a 100% virgin, bright white (TiO2) woven polyethylene master batch, Reflector Mat's superior reflective properties are perfect for apples and other crops that rely on sun exposure for colouring.

Reflector Mat's edges are sealed using ultrasonic heat to avoid fraying. Mats are rolled rather than folded in half, which removes the potential of split lines occurring at a centre fold. Reflector Mats come with a 44-month UV warranty and include details of the year of manufacture, as a reminder of the lifespan of the mat.

Product Code	Description	Width (M)	Length (M)	Weight	Colour
7155035	Reflector Mat	3.66m	100m	110gsm	White
7155029	Reflector Mat	5.15m	100m	110gsm	White

# Netting Accessories

## Butterfly Clips

Polygro® Butterfly Clips are a strong, high-quality plastic fastening clip that is used to secure shade cloth to wire. The Butterfly Clip sandwiches the shade cloth between its clip jaws and, when pressed firmly together, provides a superior hold to ensure that the cloth is firmly attached to the wire.

## Poly Link Clips

Polygro Poly Links are a strong and economical method of securing netting to wire or cable. Poly Links are made from a highly-modified nylon that ensures exceptional strength and makes the product impervious to spray absorption.

Poly Links are easily applied using a pair of multi-grips or pliers. Once the links have been closed, they are permanently closed and cannot be reused.

Product Code	Description
7175000	Poly Links 250/Pack
7175068	Poly Links 5000/Pack
7175002	Butterfly Clips
7175062	Black toothed HailStop™ Clip

## PVC Netting Sleeves

Polygro's PVC Netting Sleeves are made from white K230 high-impact, rigid PVC compound, also used in high-impact marine applications. It has a high-UV performance to ensure long-lasting durability. PVC Netting Sleeves are developed to assist in the application of sleeving netting over both 6mm and 7.5mm diameter cables.

Product Code	Description
7120005	7.5mm x 400mm Netting Sleeves
7120025	6mm x 400mm Netting Sleeves

## Post Caps

Protect your netting and shade structures from damage from rubbing, by utilising Polygro's Post Caps.

Product Code	Description
7175044	105mm Post Cap
7175045	180mm Post Cap

## Netting Repair

If a tear does occur, repair it quickly and efficiently with Polygro's Net Repair Cord and Repair Needles.

Polygro also have spare net bags to keep that excess netting safely stored away.

Product Code	Description
7175001	Black Knit Repair Cord 500m
7175023	White Knit Repair Cord 500m
7175013	Netting Repair Needles
7175053	Netting Storage Replacement Bag (900x1200, 1000kg capacity)

# Netting Accessories

## Galvanised Splices

Polygro® splices are manufactured from high tensile steel that is blended with powdered glass to provide extra grip on the wire or cable. Our splices are designed for 3.15mm wire, 6mm or 7.5mm cable and have a tensile strength of 1320 MPA. They are available in sets of 50 per carton.

Product Code	Description
7125000	3.15mm x 600mm Splices (50 Suit/Ctn)
7125001	6mm x 1m Splices (50 Suit/Ctn)
7125002	7.5mm x 1m Splices (50 Suit/Ctn)

## Galvanised Anchor Pins

Polygro® galvanised steel anchor pins are utilised during erection of Netting and Shade Structures to assist with solidity, strength and structural integrity.

## Galvanised Steel Cable

Polygro® galvanised steel cable is available in 6mm and 7.5mm diameters. It is comprised of 7 strands of either 2 or 2.5mm HT wire, to provide a tensile strength of 1570 MPA. Polygro® cables are expertly quality controlled to meet ISO 9001:2000 standards.

Product Code	Description	Wire Size	Length	Breaking Strain
7160000	6mm HT Galvanised Steel Cable	6mm	1000m	34.9kN
7160003	7.5mm HT Galvanised Steel Cable	7.5mm	1000m	51kN

## Galvanised High Tensile Wire

Polygro® wires provide superior strength for tying and stability. Our high-quality wires are manufactured to a 3.15mm outer diameter, a tensile strength of 1470 MPA and a breaking strain of 1170kg.

Product Code	Description
7160001	3.15mm x 1000m Galvanised High Tensile Wire
7160004	3.15mm x 5000m Galvanised High Tensile Wire

Please refer to [www.polygro.com.au](http://www.polygro.com.au) for information on applications and installation.

## Horticultural Landscaping

### WeedStop® Woven Mat

Polygro WeedStop® uses superior technology to manufacture mats of improved strength and quality. Our premium weed mat assists in preventing weed growth, reduces herbicide usage and increases soil moisture retention.

Product Code	Description	Width (M)	Length (M)	Weight	Colour	Planting Grids
7155015	PP Premium WeedStop®	1.83	500	95gsm	Black	Yes
7155063	PP Premium WeedStop®	1.2	500	100gsm	Black	Yes
7155064	PP Premium WeedStop®	0.915	500	95gsm	Black	Yes
7155018	PP Premium WeedStop®	1.83	100	95gsm	Black	Yes
7155002	PP Standard WeedStop®	1.83	100	80gsm	Black	No
7155001	PP Standard WeedStop®	0.915	100	80gsm	Black	No

### Eggshell Drain Mats

Polygro's super-high-strength drainage mats are suitable for all types of pots and grow bags. They provide superior drainage to ensure the healthy growth of your plants and crops. Our mats have a high pressure resistance, to ensure durability.

Product Code	Description	Width	Length	Height
7175066	Drain Mats	300mm	300mm	25mm

### U Pins

Polygro offers a range of U Pins designed for securing our range of Weed mat.

Product Code	Description	Size (mm)	Quantity per carton
6113235	U Pins	150x150x4	500
6113236	U Pins	200x200x4	150
6113237	U Pins	300x300x5	150

# Horticultural Landscaping

## Horticultural Pot Weed Mats

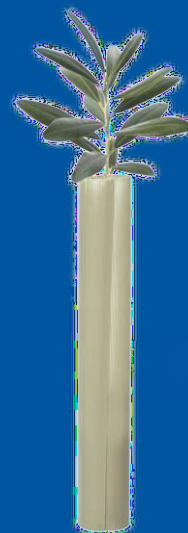

Polygro's offers a range of mats to suit a variety of pot diameters, available in coir or geofabric. Ideal for hydroponic systems, reducing moisture loss and weed establishment.

## Tubex® Tree Guards

Tubex® has been at the forefront of development since the first research into tree shelters was done in the early 1980s. Tubex® is well known for its quality and range of guards that are specifically designed to suit many different agricultural and landscaping applications.

Tree Guards protect plants from foraging animals and are specifically designed to improve the establishment of young plants.

## Horticultural Landscaping

### Home Orchard and Garden Netting

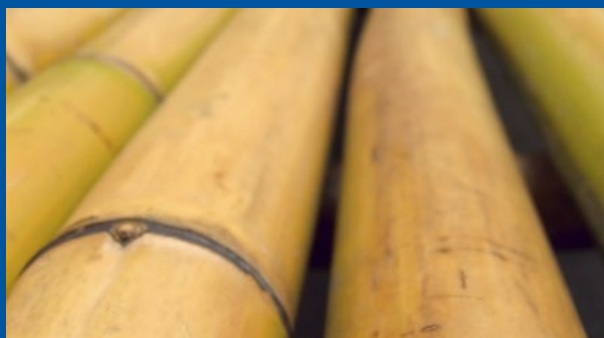

Home Orchard and Garden Netting is manufactured from HDPE yarn for tougher handling and a longer life. Our orchard nets are the ideal mesh size structure to repel birds with minimal shading and excellent air circulation.

Home Orchard and Garden Netting is simple to install and can be supported by a basic post, cable and wire structure. Our netting is UV-stabilised to ensure durability and has a 10-season, pro-rata manufacturer's UV warranty. Guide tags are also provided at 10-metre intervals on the edge of the net, along the full length.

Product Code	Description	Width	Length	Weight	Hole Size	Colour
7120024	Orchard Net	5m	5m	45gsm	15mm	White
7120021	Orchard Net	5m	10m	45gsm	15mm	White
7120018	Orchard Net	10m	10m	45gsm	15mm	White
7120022	Orchard Net	5m	100m	45gsm	15mm	White
7120023	Orchard Net	5m	100m	45gsm	15mm	Black
7120019	Orchard Net	10m	100m	45gsm	15mm	White
7120020	Orchard Net	10m	100m	45gsm	15mm	Black

### Bamboo Stakes

All Polygro® Bamboo Stakes are made from naturally-treated bamboo. They are a strong, durable option to hardwood stakes and are suitable for all plantations.
